**WHY**

**HIRE**

**RCW MEDIA?**

**BIRTHDAY PARTIES;  
ANNIVERSARIES;  
CELEBRATIONS**

RCW Media would be delighted to capture all the fun and atmosphere of your party or celebration and then present you with a beautifully shot, edited and scored record of proceedings for you to enjoy over and over again. Included in the edit will be a collection of Special Memories - personal greetings from all your guests who wanted to say something to you (or about you!) on camera.

**PERSONAL**

It's all about you and your special event which we are capturing. The most important thing for us is your experience of the event, that you come away with a special memory of what happened.

We count it a privilege to be a part of your day and to provide you with something which you will look back on for years to come and remember what a special time that was.

**PROFESSIONAL**

We are dedicated to making sure that you enjoy your day uninterrupted by the videotaping of it. We know that you want to have the best possible recording of your event without feeling that you have spent the day peering into the lens of the video camera. RCW Media always puts your enjoyment of the day first and pride themselves on maintaining a low profile. Many clients have said that they "did not know we were there."

**FRIENDLY**

Pictures paint a thousand words but the moving image gives you the chance to relive the emotions, the laughter and all the aspects which together have made your day special. It enables your friends, both those who were there and those who weren't the opportunity of sharing your special memories with you.

*At RCW Media Services  
we provide media services for you with the utmost  
privacy and quality !*

## Quality Vision

Professional cameras are used. These superb cameras deliver exceptional visual and audio recording. The choice of camera is made after discussing the style and theme of your wedding.

## Superb Sound

The laughter of your guest and that emotional speech by your DAD; reasons why sound is so important.

Only the best audio recording technology is employed to deliver exceptional sound.

## Camera Support

Only tripods and camera support systems are used to give the best picture shake-free footage. Occasionally hand held footage is taken with the help of the anti-shake feature of the camera.

## Lighting

Minimal lighting is used on the day, an onboard light system provides a soft fill for the reception coverage. Natural light is always utilized where available as it produces lovely images.

## Post Production

Several software platforms are used to edit and author the finished wedding video.

Only true highest-grade DVDs are used to archive your wedding day for the future.

## Personal menus

All the DVD's will have scene selection which enables you to jump to any part of your DVD quickly. Your DVD is carefully chaptered, marking all the important moments on the scene selection menu.

## Label Design

The finishing touch is the packing. Your DVDs are presented in photo-quality cases. Printing is done directly onto the DVD surface, this does away with inferior glue-on labels that can lift over time.

### **Lily Video Memories Package**

**495.00**

- One Videographer with professional camera: This package is for ceremony recording only for the budget minded couple.
- We attend rehearsal the day before.
